Draft Yosemite Valley Implementation Plan and Draft Supplemental Environmental Impact Statement; Yosemite National Park, California; Notice of Availability

SUMMARY: Pursuant to § 102(2)(C) of the National Environmental Policy Act of 1969 (P.L. 91-190 as amended), the National Park Service, Department of the Interior, has prepared a Draft Supplemental Environmental Impact Statement (DSEIS) assessing the potential impacts of a proposed Yosemite Valley Implementation Plan for Yosemite National Park, California. The DSEIS identifies and analyzes a proposed action and three alternatives for carrying out certain provisions of the 1980 General Management Plan (GMP). Those provisions call for removing unnecessary structures, restoring and protecting recovered land, relocating facilities out of sensitive or hazardous areas, and reducing traffic congestion in Yosemite Valley. This DSEIS also incorporates the 1992 Concession Services Plan and pertinent information from the 1996 Draft Yosemite Valley Housing Plan with the GMP into a comprehensive implementation plan. Each alternative describes a proposal for the management and use of Yosemite Valley and discusses changes in the valley's developed areas, cultural and natural resource management, interpretation and visitor services, and park operations. The environmental consequences of the proposed action and the three alternatives are fully documented in the DSEIS, and appropriate mitigation measures to reduce or eliminate impacts are identified. Once approved, the plan will provide implementation guidance for carrying out provisions of the GMP.

Proposal

Under Alternative 2 (the proposed action), the National Park Service (NPS) would emphasize a comprehensive approach to carrying out the provisions of the GMP and subsequent plans. Implementation of the proposed action would allow for approximately 147 acres in the east end of the valley to be restored to natural conditions, 82 acres redesigned, and 38 acres developed to accommodate relocated facilities or functions. An orientation/transfer facility would be located in the west end of the valley at Taft Toe. Day use visitors and out-of-park transit bus riders would be intercepted there and would use the valley shuttle bus system
